From: Dan Ditscheit, PLA

Re: Park/School Property Trade Proposal

The Parks, Recreation and Forestry Department and Green Bay Area Public Schools have worked cooperatively to propose the following property trade agreement for consideration.

	School District Property (Acres) to Deed to City	City Property (Acres) to Deed to School District
Beaumont Park/School		0.80
Chappell Park/School		4.00
Fort Howard Park/ Jefferson Head Start Learning Center		0.45
Fort Howard School		0.65
Keller School	1.26	
MacArthur School/ Beaver Dam Park	5.59	
Nicolet Park/School		2.76
Sullivan Park/School		1.58
Total Acreage	6.85	10.24

- Acreage may vary slightly based on final survey details.
- GBAPS will provide the City with a 9-month planning option for Elmore Elementary and Tank Elementary.
- GBAPS will be responsible for all costs of razing MacArthur Elementary and demolishing the asphalt play surface adjacent to the school.
- Restrictions will be included to prevent MacArthur Elementary from being repurposed as a 4K-12 educational facility if it is not razed.
- The planning option agreement will include restrictions on using Elmore Elementary or Tank Elementary as a 4K-12 educational facility.
- If the GBAPS uses City Tax Incremental District funding to demolish MacArthur Elementary, it will deed 2.5 acres at the Wilder Elementary site to the City.
- The City and GBAPS will determine the appropriate start date of the 9-month planning options for Tank Elementary and Elmore Elementary based on the timing of the schools' closing. The planning options cannot begin until the schools are closed.
- The City will encourage affordable housing when finding a developer for Elmore and Tank Elementary, but it will not be a requirement.

Dear Sadie Kimble:

BCI Burke Company - Samples & Donations is delighted to provide BCI Burke Company with this playground equipment proposal.

This design was developed with your specific needs in mind, and we look forward to discussing this project further with you to ensure your complete satisfaction. BCI Burke Company - Samples & Donations is confident that this proposal will satisfy BCI Burke Company's functional, environmental, and safety requirements -- and most importantly -- bring joy and excitement to the children and families directly benefiting from your new playground.

You have our personal commitment to support this project and your organization in every manner possible, and we look forward to developing a long-standing relationship with BCI Burke Company. We appreciate your consideration and value this opportunity to earn your business.

Sincerely,

Sadie Kimble

FEATURED PLAY EVENTS

PlayEnsemble Supine Chimes

As a universal experience that inspires everyone to create, music brings a sense of wonder to the play environment. Musical experiences aren't just play; they accelerate child development intellectually, socially and emotionally.

PlayEnsemble Terra Metallophone

As a universal experience that inspires everyone to create, music brings a sense of wonder to the play environment. Musical experiences aren't just play; they accelerate child development intellectually, socially and emotionally.

PlayEnsemble Cirque Drums

As a universal experience that inspires everyone to create, music brings a sense of wonder to the play environment. Musical experiences aren't just play; they accelerate child development intellectually, socially and emotionally.

DESIGN SUMMARY

BCI Burke Company - Samples & Donations is very pleased to present this Proposal for consideration for the NFL Draft Day Family Zone located in North Fond du Lac. BCI Burke Company, LLC has been providing recreational playground equipment for over 100 years and has developed the right mix of world-class capabilities to meet the initial and continuing needs of BCI Burke Company. We believe our proposal will meet or exceed your project's requirements and will deliver the greatest value to you.

The following is a summary of some of the key elements of our Proposal:

- Project Name: NFL Draft Day Family Zone
- Project Number: 999-197860-1
- User Capacity: 64
- Age Groups: 5 to 12
- Dimensions: 17' 4"x17' 0"
- Designer Name: Tyler Hess

BCI Burke Company - Samples & Donations has developed a custom playground configuration based on the requirements as they have been presented for the NFL Draft Day Family Zone playground project. Our custom design will provide a safe and affordable playground environment that is aesthetically pleasing, full of fun for all users and uniquely satisfies your specific requirements. In addition, proposal # 999-197860-1 has been designed with a focus on safety, and is fully compliant with ASTM F1487 and CPSC playground safety standards.

We invite you to review this proposal for the NFL Draft Day Family Zone playground project and to contact us with any questions that you may have.

Thank you in advance for giving us the opportunity to make this project a success.

The use and layout of play components identified in this plan conform to the CPSC guidelines. U.S. CPSC recommends the separation of age groups in playground layouts.

BURKE GENERATIONS WARRANTY®

BCI Burke Company, LLC ("Burke") warrants that all standard products are warranted to be free from defects in materials and workmanship, under normal use and service, for a period of one (1) year from the date of shipment.

We stand behind our products.

In addition, the following products are warranted, under normal use and service from the date of shipment as follows:

- One Hundred (100) Year Limited Warranty on aluminum and steel upright posts (including Nucleus®, Nucleus Evolution®, Nucleus Aspire®, Intensity®, Level X®, Synergy®, Synergy Imagination® & 4ME®) against structural failure due to corrosion, deterioration or workmanship.
- One Hundred (100) Year Limited Warranty on KoreConnect® Clamp Castings against structural failure due to corrosion, deterioration or workmanship.
- One Hundred (100) Year Limited Warranty on Hardware (nuts, bolts, washers).
- One Hundred (100) Year Limited Warranty on bolt-through and direct-bolt fastening and clamp systems (Synergy®, Intensity®, Nucleus®).
- Twenty-Five (25) Year Limited Warranty on spring assemblies and aluminum cast animals.
- Fifteen (15) Year Limited Warranty on structure platforms and decks, metal roofs, table tops, bench tops, railings and barriers against structural failure due to materials or workmanship.
- Fifteen (15) Year Limited Warranty on all plastic components against structural failure due to materials or workmanship.
- Ten (10) Year Limited Warranty on ShadePlay® Canopies fabric, threads, and cables against degradation, cracking or material breakdown resulting from ultra-violet exposure, natural deterioration or manufacturing defects. This warranty is limited to the design loads as stated in the specifications.
- Ten (10) Year Limited Warranty on NaturePlay® Boulders and GFRC products against structural failure due to natural deterioration or workmanship. Natural wear, which may occur with any concrete product with age, is excluded from this warranty.
- Ten (10) Year Limited Warranty on Full Color Custom Signage against manufacturing defects that cause delamination or degradation of the sign. Full Color Custom Signs also carry a two (2) year warranty against premature fading of the print and graphics on the signs.
- Five (5) Year Limited Warranty on Nucleus®, Intensity®, and RopeVenture® cables against premature wear due to natural deterioration or manufacturing defects. Determination of premature wear will be at the manufacturer's discretion.
- Five (5) Year Limited Warranty on rubber belt material against premature wear due to natural deterioration or manufacturing defects. Determination of premature wear will be at the manufacturer's discretion.
- Five (5) Year Limited Warranty on moving parts, including swing components, against structural failure due to materials or workmanship.
- Five (5) Year Limited Warranty on PlayEnsemble® cables and mallets against defects in materials and workmanship.
- Three (3) Year Limited Warranty on electronic panel speakers, sound chips and circuit boards against electronic failure caused by manufacturing defects.

The warranty stated above is valid only if the equipment is erected in conformity with the layout plan and/or installation instructions furnished by BCI Burke Company, LLC using approved parts; have been maintained and inspected in accordance with BCI Burke Company, LLC instructions. Burke's liability and your exclusive remedy hereunder will be limited to repair or replacement of those parts found in Burke's reasonable judgment to be defective. Any claim made within the above stated warranty periods must be made promptly after discovery of the defect. A part is covered only for the original warranty period of the applicable part. Replacement parts carry the applicable warranty from the date of shipment of the replacement from Burke. After the expiration of the warranty period, you must pay for all parts, transportation and service charges.

Burke reserves the right to accept or reject any claim in whole or in part. Burke will not accept the return of any product without its prior written approval. Burke will assume transportation charges for shipment of the returned product if it is returned in strict compliance with Burke's written instructions.

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IF THE FOREGOING DISCLAIMER OF ADDITIONAL WARRANTIES IS NOT GIVEN FULL FORCE AND EFFECT, ANY RESULTING ADDITIONAL WARRANTY SHALL BE LIMITED IN DURATION TO THE EXPRESS WARRANTIES AND BE OTHERWISE SUBJECT TO AND LIMITED BY THE TERMS OF BURKE'S PRODUCT WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OF CERTAIN IMPLIED WARRANTIES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

Warranty Exclusions: The above stated warranties do not cover: "cosmetic" defects, such as scratches, dents, marring, or fading; damage due to incorrect installation, vandalism, misuse, accident, wear and tear from normal use, exposure to extreme weather; immersion in salt or chlorine water, unauthorized repair or modification, abnormal use, lack of maintenance, or other cause not within Burke's control; and

Limitation of Remedies: Burke is not liable for consequential or incidental damages, including but not limited to labor costs or lost profits resulting from the use of or inability to use the products or from the products being incorporated in or becoming a component of any other product. If, after a reasonable number of repeated efforts, Burke is unable to repair or replace a defective or nonconforming product, Burke shall have the option to accept return of the product, or part thereof, if such does not substantially impair its value, and return the purchase price as the buyer's entire and exclusive remedy. Without limiting the generality of the foregoing, Burke will not be responsible for labor costs involved in the removal of products or the installation of replacement products. Some states do not allow the exclusion of incidental damages, so the above exclusion may not apply to you.

The environment near a saltwater coast can be extremely corrosive. Some corrosion and/or deterioration is considered "normal wear" in this environment. Product installed within 500 yards of a saltwater shoreline will only be covered for half the period of the standard product warranty, up to a maximum of five years, for defects caused by corrosion. Products installed in direct contact with saltwater or that are subjected to salt spray are not covered by the standard warranty for any defects caused by corrosion.

Contact your local Burke Representative for warranty information regarding Burke Turf® and Burke Tile products.

Terms of Sale

Pricing: Prices published in this catalog are in USD, are approximate and do not include shipping & handling, surfacing, installation nor applicable taxes. All prices are subject to change without notice. Contact your Burke representative for current pricing. Payments are to be made in USD.

Weights: Weights are approximate and may vary with actual orders.

Installation: All equipment is shipped unassembled. For a list of factory-certified installers in your area, please contact your Burke representative.

Specifications: Product specifications in this catalog were correct at the time of publication. However, product improvements are ongoing at Burke, and we reserve the right to change or discontinue specifications without notice.

Loss or Damage in Transit: A signed bill of lading is our receipt from a carrier that our shipment to you was complete and in good condition upon arrival. Before you sign, please check the Bill of Lading carefully when the shipment arrives to make sure nothing is missing and there are no damages. Once the shipment leaves our plant, we are no longer responsible for any damage, loss or shortage.

For more information regarding the warranty, call Customer Service at 920-921-9220 or 800-356-2070.

- I. JBS Amendment #3 Proposal Letter 3-6-2025

collaborāte / formulāte / innovāte

March 6, 2025

Mr. Dan Ditscheit, PLA
Director
City of Green Bay
Parks, Recreation & Forestry Department
100 N. Jefferson Street, Room 510
Green Bay, WI 54301

SUBJECT: JBS Site Redevelopment
Amendment #3
New Barn Building Design

Dear Dan:

We are very pleased to provide you with this proposal to amend our professional services. When accepted, this proposal will amend our Agreement dated November 21, 2022. This would be the Third Amendment to our original contract for Project titled "Conceptual Site Planning Services for the Redevelopment of the JBS Site dated November 1, 2022.

This proposal is for the JBS Site Redevelopment (Project). This proposal is subject to Terms and Conditions of the original contract.

It is our understanding that the nature of the overall Project is a subdivision and park consisting of public roadways, utilities, site grading and stormwater management; a destination playground; a destination park; and a future urban barn/community building.

The subject of this amendment is the design of a new barn building to provide space and use for both the City's park operations and Wello's farming operations as outlined in your Project Scope Changes document. We understand the overall budget for design, permitting, and construction for the barn is to be \$750,000. Solar array system is separately funded at \$50,000. A general list of the items to be housed within the barn building per your scope outline include:

- Two (2) 40'x10' Refrigeration Systems (per specs provided)
- Parks Department Storage
- Farming Equipment Storage
- Two (2) Family Restrooms
- Exterior Attached Overhang Covered Patio
- Roof mounted solar array (funding provided by City under separate budget)

We are also removing a portion of the scope and fee from Amendment #2 pertaining to the 2-stall garage site analysis and layout; and efforts related to coordination of City purchase of the garage unit, site redesign, custom roof design for single slope and to support solar array, and utility services for the garage.

For this Project, GRAEF proposed to provide the following additional Basic Services:

Design

Project Management

- Overall Project coordination with design team and City staff.
- Coordination with WPS and other private utilities for their services and metering to the new barn for the facility and site services.
- Prepare necessary front end Special Provisions for separately bidding the barn project.
- Submit for required building permits for the barn.
- Submit for formal City Site Plan review and approval.

Civil

- Analyze the site areas for placement of the barn, once programming and general building sizing is completed. Provide up to two (2) optional location concepts for consideration by the City. Revise appropriate civil drawings to reflect the preferred location.
- Review of utilities extensions currently planned to other locations for modification to this new barn building with associated services and meters.
- Modify appropriate civil drawings to the Parks Package and/or Infrastructure Package for revised utility extensions, sidewalks, and elimination of the greenhouse facility.
- Prepare supplemental specifications for work not covered in City standard specification for bidding of the barn building scope of work. These are expected to primarily include utility services to the barn.
- Assist the City with Change Order processing under the Parks Package and/or Infrastructure Package for work to be completed under those contracts.

Architectural

- Program of spaces based on the size and functional requirements in relation to the site and day to day operations.
- Develop floor plans, elevations, and sections to understand the Structural, Mechanical, Electrical, and Plumbing space requirements, clearances and aesthetics of building design.
- Develop extent of solar array on the roof, and roof access requirements.
- Review code requirements for Life Safety for the proposed design
- Incorporate designed aesthetic enhancements to barn exterior finishes to meet City zoning code requirements and consistency with the housing development. Interior finishes will be minimal and appropriate for the noted uses. Bathroom interior finishes will be typical for Parks Department bathroom facilities within the City.
- Prepare construction documents including:
 - Overall Floor Plan
 - Enlarged Plan(s)
 - Reflected Ceiling Plan

- Equipment Layout Plan
- Roof Plan
- Building Sections (2)
- Wall Sections
- Schedules, Notes and Details
- Specifications

Structural

- Code/Load Review
- Preliminary layout of structural framing and lateral systems (anticipate wood roof trusses, wood stud walls, shallow footing foundations, concrete slab on grade)
- Coordination of structural system with team as required
- Final structural drawings and details
- Structural specifications

Mechanical

- Produce sealed Heating Cooling and Ventilation calculations in accordance with local codes and industry design standards fit for submission to Authority Having Jurisdiction.
- Design of HVAC system to serve the restrooms and storage areas.
- Design of exhaust systems to serve the restrooms and storage areas.

Electrical

- Building electrical service design, revised from Community Building electric service.
- Provide Power Utility coordination for electrical service.
- Prepare construction documents of electrical systems, including:
 - Exterior building/patio lighting.
 - Design interior lighting and controls.
 - Design interior code required emergency lighting for Path of Egress.
 - Design interior power receptacle plan to meet code requirements.
 - Design for solar array on roof.
 - Provide power for two on-site shipping containers.
 - Site power/circuiting for playground lighting, water feature/splash pad pumps, additional amenities; revised from Community Building service/panel.
 - Circuiting and site underground provisions for future EV chargers, additional solar power/feature.
 - Provide electrical details, schedules and one-line riser diagram.
- Provide specifications in booklet format.
- Participate in virtual design coordination meetings. Two (2) meetings have been assumed.

Plumbing

- Design gravity sanitary and storm sewer service to new connection point within five feet of the building footprint.

- Design domestic water service to a new connection point within five feet of the building footprint.
- Design domestic water distribution system throughout building including central hot water systems serving restrooms.
- Design sanitary and vent distribution throughout building.
- Design roof storm drainage from flat roof areas to storm water connection within five feet of building footprint.
- Select plumbing fixtures based on client standards.

Landscape

- Modifications to Parks Package drawing L101 to include planting plan revisions and additions around the barn building meeting City code requirements.

Construction Services for the building are already included in our current Phase 2 Engineering Task 4 scope of work for the barn building and those hours would be used for similar efforts on this barn building for all disciplines.

The following assumptions have been made in preparation of this amendment:

- There will be no need for IT/Data or security system card access/camera systems.
- Site related changes (pavements, grading, landscaping, utility extensions, drainage) will be processed through the existing JBS Park Package and Infrastructure Package contracts and not bid with the barn building.
- Refrigeration units will be purchased by others and provided for installation by contractor under the barn bid package.

GRAEF will endeavor to perform the proposed additional Basic Services in accordance with the following schedule:

- Authorization to Proceed on or before March 12th, 2025
- Completion of above noted design scope on or before May 15th.
- Permitting: Submittal week of May 19th.
- Construction: Summer of 2025

GRAEF can provide a scope and fee for further Additional Services upon request. Other Additional Services we can provide include:

- Participate in additional meetings beyond those described in this scope of service.
- Design of Architectural other than described in the above scope of service.
- Architectural Renderings of building.
- Design of electrical systems other than described in the above scope of service.
- Preparation of As-Built plans based on contractor furnished installation plans.
- Coordinate rough-in for voice/data, security/card access control system and security camera locations. Designed by others.
- Full design for Low-Voltage Systems (card access, security cameras, IT/data-WiFi) with owner meetings, and specification sections.

collaborāte / formulāte / innovāte

It is our understanding that you will provide the following services, items and/or information:

- Bidding of New Barn Building
- Permit and review fees

You agree to compensate GRAEF for all additional Basic Services as noted below:

Additional Lump Sum Fee for new barn scope:	\$85,000
Deduct of Lump Sum Fee from Amendment #2 (Original Garage):	(\$10,000)
TOTAL ADDED FEE:	\$75,000

Upon receipt of an executed amendment, GRAEF will commence work on the additional Basic Services for the Project.

Please call us at 920-405-3814 if you have any questions regarding this proposal.

Sincerely,

Graef-USA Inc.

Patrick J. Skalecki, P.E., LEED AP
Vice President | Principal

POLTANK 42"- Horizontal Commercial Sand Filtration System

FEATURES

- Simplified trouble free operation
- Outstanding filtration efficiency
- Greatest level of convenience compared to other filter types
- Rugged non-corrosive, weather resistant design
- 50 psi operating pressure
- Patented 360° ABS slotted lateral and PVC diffuser provide balanced water flow through filter bed
- 10 year limited warranty
- Single, multiple and stacked tank configurations
- Reliable and efficient operational accessories
- NSF Certified

Form no. Poltank-42-spec
Effective 12/15

DESCRIPTION

Fluidra horizontal sand filtration systems are manufactured in Jacksonville, Florida using CNC controlled filament winding equipment. The tanks are constructed with a dual laminate process consisting of a non-continuous strand and roving inner structure combined with a filament wound outer structure. The tanks superior construction is resistant to fatigue associated with operational cycling, corrosion and scaling and will provide decades of reliable service.

The horizontal filters are designed for 50 psi operating pressures, available in 5 tank diameters providing 35 models. The filters are available in single, multiple and stacked tank configurations. The filter(s) come standard with a 16" round manway opening and cover, flanged influent/ effluent ports, manual air vent and media/water drain combination port. The filters are NSF listed for filtration rates from 5 to 20 gpm/ ft² of filter area with operating flows from 67 to 1500 gpm in a single tank. The tanks come fully assembled with an imbedded U.V. protection for outdoor installations.

Operational accessories including standard and custom manifold systems with or without unilever operation, semi and fully automatic backwash control systems and filter media can be purchased individually or with the filter tanks when ordering a system.

MATERIALS & DESIGN

FILTER SYSTEM

The filter system specified under this section shall be a pressurized Hi-Rate Permanent Media Filter design as manufactured by Fluidra USA.

The filter system shall be of the horizontal type suitable for a single grade of media and shall be certified for swimming pool/ spa use by NSF International to NSF/ ANSI Standard 50. The filter certification shall be for a maximum flow of 20 gallons per minute per square foot of filter area.

The filter tank system shall consist of a 42½" horizontal filter tank(s), internal distribution system, internal air vent, manway opening/ cover, external vent and drain assembly. The tank(s) shall be manufactured in a fully assembled state with the external air vent disassembled for shipping. The filter(s) shall be designed and manufactured in a manner to allow for shipping under normal conditions without internal damage to the filter.

FILTER AREA

The filter plant shall consist of _____, 42" Horizontal Hi-Rate Permanent Media Filter(s) with a total effective filter area of _____ square foot each. When operating at _____ gpm per square foot of filter area, the filter system will have a capacity of filtering _____ gallons in _____ minutes.

FILTER TANK(S)

The filter tank(s) shall be 42" in diameter with a total length of _____" and shall be constructed Fiberglass resin with a maximum working pressure of 50 psi, hydrostatically tested to 1.1 x maximum working pressure and designed to a minimum of 5:1 safety factors.

Each filter tank(s) shall consist of a body and two dished heads manufactured with a dual wall structure consisting of a contact molded inner structure and a filament wound outer structure. The inner structure shall be manufactured with Woven Roving and Chop Strand Mat on a male mold in a two or three-piece design, depending on length, and joined together with secondary joint(s) before applying the outer structure. The outer structure shall be filament wound in both radial and axial geometric patterns to provide maximum strength in all load directions. The dished heads and body thicknesses shall be designed according to ASME Section X requirements confirmed through calculations and a Finite Element Stress Analysis. The outer structure of the tanks shall be seamless and constructed of pigmented resin to provide a professional exterior finish.

The filter tank(s) shall be mounted on two FRP saddle supports that are permanently bonded to the tank through the use of a structural adhesive system. Stacked tank configurations shall include saddles on top of the bottom tank to accommodate stacking of the top tank. The tank support saddles shall be designed in

compliance to all relevant seismic code requirements when anchored to the manufacturer's specifications.

A 16" round flanged manhole complete with FRP cover, O-ring and bolts shall be located in the body of the filter tank(s). All o-ring contact points on the manhole flange and cover shall have a smooth finish to provide a continuous watertight seal.

A molded 3" combination media dump port and drain complete with a ABS media retainer and flange type closure shall be located in the side shell of the filter tank(s).

A molded ¾" external air relief complete with PVC ball valve shall be located in the side shell of the filter tank(s).

The influent and effluent ports shall be flanged to facilitate proper connection of both internal and external piping. The influent/ effluent ports shall consist of FRP flanges designed according to ASTM-PS 15-69-NBS with a ANSI standard 150 lb. bolt pattern.

INTERNAL DISTRIBUTION/COLLECTION SYSTEM

The filter tank equipment shall include an upper distribution system and lower collection system, hydraulically balanced to prevent filter media migration during filter operation and/ or backwash.

The upper distribution system shall include hydraulic diffusers manufactured of injection molded PVC plastic, located in multiple sets of two over the filter bed. They shall be piped to a Schedule 80 PVC distribution header with Schedule 80 PVC pipe and fittings appropriately sized to maintain proper flow velocities throughout the entire distribution system.

The lower collection system shall consist of a Schedule 80 PVC header and molded ABS plastic laterals with .009" tapered slots designed to retain a single grade of filter media with .23 mm particle size. The internal collection system shall be designed to promote media bed circulation during backwash while providing minimal head loss during filtration.

FILTER MEDIA

Filter media shall consist of a carefully selected grade of hard, uniformly graded silica with a minimum combined mean percent of silica by weight of 90%, which shall be free of limestone or clay. The silica shall be angularly shaped particles with a particle size between .45mm and .55 mm and a roundness value between 0.0 and 0.15. Round or Sub-rounded particle shapes will not be acceptable. The uniformity coefficient shall not exceed 1.50 with a specific gravity of not less than 2.5 with a minimum hardness of 7 mhos. Support media shall be hard, water rounded silica material, uniformly graded ⅛"

– ¼" gravel, no limestone or clay shall be present. Alternate media must be approved by the filter manufacturer.

PRESSURE GAUGE PANEL

The pressure gauge panel shall consist of two 2½" diameter Flutter Guard gauges scaled from 0-100 PSIG. The pressure gauges shall be mounted in an injection molded panel. The pressure gauges shall be connected to influent and effluent pressure points with air relief cocks, compression fittings and semi-rigid PVC tubing.

The filter system as outlined herein shall be Fluidra USA Model No. _____.

FACE PIPING

The face piping shall be fabricated in a fully assembled state by the filter manufacturer of Schedule 80 PVC pipe and fittings. Flanges shall be located to allow for easy disassembly to prevent damage during shipping.

The butterfly valves shall be constructed of PVC with aluminum handles. The valve shall have EPDM and PE that provide shut off up to 150 psi while sealing the valve stem from exposure to internal liquids. The face piping shall be certified by NSF International as an operational component for the filter system carrying the same pressure and flow ratings as the filter tank.

SINGLE LEVER LINKAGE

A clevis and rod linkage system shall connect the butterfly valves provided with the face piping. Simplified operation shall be achieved through the raising or lowering of a single operating handle.

Connecting components shall vary in length to provide suitable mechanical advantage to operate the system. All valves shall operate simultaneously to eliminate the possibility of water hammer. The linkage components shall be constructed of T304 stainless steel designed to allow for individual valve adjustment to ensure proper positioning of the valves.

ELECTRIC ACTUATOR

An electromechanical actuator shall be mounted on each valve of the face piping kit. The actuator shall be automatically operated during initiation of the backwash cycle and return to filter cycle through the use of 115-volt AC totally enclosed motor sized at a 2:1 safety factor to the seating torque of the butterfly valve with a torque limiter. The actuator shall have a closure time of 15 seconds/ 90 degrees with a manual override, BSR safety brake to prevent valve slippage and visual position indicator. The actuator shall have a digital positioning system with dual open and close limit switches for feed back to the backwash control system.

- I. WildOnes Grant Tracking Form-Feb 2025

GRANT TRACKING FORM

PART #1: Notification of Grant Funds

(emailto:Kim.Rivest@greenbaywi.gov)

APPLICANT DEPARTMENT: PRF

DATE: 02/26/2025

APPLICANT DEPARTMENT GRANT CONTACT NAME/TITLE: Maria Otto/Conservation Corps Coordinator

APPROPRIATE COMMITTEE: Parks

NAME OF GRANT/FUNDING SOURCE: Green Bay Wild Ones/Private

AMOUNT OF GRANT REQUEST: \$500

LOCAL MATCH REQUIREMENT: \$0

SOURCE OF MATCH: ☐ General Fund ☐ Non-General Fund ☒ Not Applicable

TIMEFRAME OF GRANT: 07/01/2025 through 09/01/2025

TYPE OF GRANT REQUEST: ☒ Monetary ☐ Other (explain under 'purpose of grant')

PURPOSE OF GRANT (summary): To convert unused turf grass around the newly installed art sculptures at Farlin Park into native pollinator plantings.

How does the grant meet City/Department needs? Reduce turf grass, reduce maintenance needs, improve pollinator habitat

What are the personnel requirements (include both existing and new staff) of the grant? Conservation Corps will install the plants and maintain weekly. Estimated 4 hours of installation and 30-minutes weekly for maintenance.

DEPARTMENT HEAD SIGNATURE: _____

PART #2: Request to Accept Grant Funds

(complete after notification of grant award; emailto:Kim.Rivest@greenbaywi.gov)

AMOUNT OF GRANT AWARD: \$500

ATTACHMENTS

None

**PARKS COMMITTEE
DIRECTOR'S REPORT
WEDNESDAY, MARCH 12, 2025**

PARK DIVISION

- With the warmer weather we are experiencing snow melting. Garbage that has accumulated in the snow piles over the winter are now visible. Please be patient as Park crews make the rounds to pick up this additional garbage throughout the park system. As more snow melts Park crews will continue to pick up trash to help keep our city clean.
- The ice rinks are closed for the season due to the recent warm weather. The rinks have been skateable since mid-January, making this one of the better years for hockey and ice-skating rinks in recent years.
- Park caretakers continue to make daily rounds of the parks and facilities. Staff inspects for vandalism, damaged doors, windows, and any other oddities within our parks.
- The Showmobile renovation is now completed. Much of the wood paneling was replaced due to rotting. The Showmobile now has a new exterior graphics wrap that was installed. Our park painter along with park maintenance workers have been putting a fresh coat of paint throughout the interior.
- Staff are in the process of going through our picnic tables, repairing broken boards and giving the tables a fresh coat of paint.
- Park carpenters continue to work on smaller shelter renovations at the Marquette shelter bathrooms, including tiling floors and painting. Renovations at Ft. Howard shelter bathrooms and Colburn 9th bathrooms have been completed.
- Park supervisors continue to have interviews for summer seasonal positions. Staff are also reaching out to previous summer employees to see if they are interested in working for us again in 2025.

FORESTRY DIVISION

- Crews are working on cycle pruning and dormant season oak pruning. This pruning is currently occurring in the Tank, Marquette, Beaumont and Mather Heights Park neighborhoods. Typical cycle pruning includes raising tree limbs for clearance, deadwood pruning and structure pruning to help reduce the chances of breakage during storms. Dormant oak pruning is taking place throughout the city. The last day to prune oaks until October is March 15th.
- Forestry staff continue to work with IT staff on transferring our tree inventory to a GIS format.
- Crews are in full operation of the winter tree removal cycle. Currently the crew is working on Country Club Road to assist DPW in prepping the road for the upcoming construction project.
- Staff attended the Wisconsin Arborist Association Conference in Green Bay Feb 16th-18th. Three days of topics included tree climbing techniques, safety topics, mitigation of tree damage during storms and urban tree canopy to name a few.

DESIGN & DEVELOPMENT DIVISION

- Staff reviewed the final draft set of bid documents for the HVAC upgrades for the Bay Beach Amusement Park pavilion. The consultant will make the final changes to the plans over the next few weeks.
- The Friends of Bay Beach have hired a contractor for the construction of the West End Train expansion and proposed restroom. Construction should begin in the next week. The engineering consultant is in the process of completing the electrical design.
- Staff are working with a consultant to complete the wildlife viewing platform and shoreline walk construction plans for Bay Beach Amusement Park.
- Shipyard Phase II design work continues. The consultant recently completed a 3-day design charrette to refine the masterplan.
- Planning continues for the Joliet Park AOC habitat restoration project. A community input meeting to review the final design is being planned.
- Staff are working with the Department of Public Works (DPW) on planning for the wetland project at East River Van Beaver Park.
- Staff are reviewing the final construction plans for the Main Street East River Trail project.
- Construction of the Seymour Park west stormwater development continues.
- Construction of the JBS Park/Boulevard continues.
- The consultant has been selected for the Beach Wildlife Sanctuary and Renard Island Nearshore Area. Design work will begin soon.
- Staff attended the Wisconsin American Society of Landscape Architects annual conference.

GREEN BAY CONSERVATION CORPS

- The Community Corps staff have continued to hold stakeholder meetings to plan and design the new AmeriCorps program.
- Staff met with Tony Weid on March 5th to discuss the AmeriCorps program.
- Four new members will start on March 17th. Staff have started actively recruiting for the summer positions and have begun interviewing.
- Members have planted the greenhouse and completed winter sowing of native species. An estimated 4,000+ plants have begun sprouting. These plants will be installed at Farlin Park around the art sculptures.
- Members continue to cut and remove invasive woody species, such as buckthorn, from Red Smith Park, WLS, Newberry, Westside Trail, East River Van Beaver, and Joliet.
- Staff received a grant from Wild One's to purchase more plants for the Farlin Park planting.
- Staff presented at the Brown County Seed Library Launch Party on March 8th.
- Staff presented at Notre Dame Academy for the Conservation Corps and career development.

- Members have started training for the spring frog and toad surveys which will begin in late April/early May.
- Staff attended The Corps Network annual conference in Arlington, VA from March 10th–14th and attended meetings with Congress.
- Serve Wisconsin completed the annual financial site visit on February 19th, 2025, to ensure that the program remains in compliance with AmeriCorps policies and procedures.
- Staff and members have begun planning for Earth Day. This year there will be two Earth Day events hosted by the GBCC – a volunteer day on April 22nd and an Environmental Fair on April 26th. More details will be released soon.
- Members continue to complete Disaster Response training through Serve Wisconsin.
- Staff received a grant award to fund a large-scale volunteer effort for the NFL Draft. This will result in additional trail work, restoration, and beautification projects. Planning has begun for these events.

RECREATION DIVISION

- We are finalizing school and youth baseball and softball field permits.
- The adult softball league registration has begun. We will be offering Men's Slow-pitch, Men's 55+ Slow-pitch, Co-Ed Slow-pitch and Women's and Men's Modified softball leagues at Beaver Dam Park. The season is scheduled to begin the week of May 5th.
- Registration is currently taking place for our recreation summer day camps at the WLS. The camps will run M-Th for 8 weeks. The recreation summer day camp at the WLS is scheduled to begin the week of June 16th. There are 8 weekly camps being offered.
- The adult basketball program championship games are scheduled to take place March 12.
- We are currently accepting job applications for Camp Instructors, Softball Umpires, and Site Supervisors.
- Staff are currently planning activities and events to take place throughout NFL Draft weekend, April 23-26.
- Dance rehearsal March 11th and Dance recital March 18th at Edison Middle School.
- Mini Dribblers classes were completed on Monday, March 3rd. Both classes were full and hosted at Red Smith and King Elementary.
- Youth Soccer Skills registration is ongoing, and the program will begin April 14th at Edison Middle School.

AQUATICS

- Staff are beginning to plan a dog swim event for the end of summer, more details to come.
- The January 16th aquatic staff recruitment informational meeting was successful. We are discussing dates for future meetings.
- Rehire information has been sent out. We also sent out cards to returning staff as a fun reminder to complete their paperwork and secure their position.

- Staff are continuing to develop a plan for lifeguard recruitment. Along with the cards to returning staff, we sent out "tag a friend" cards as a tool to encourage staff to have their friends apply. Both the staff member and friend applying will put their name on the card and the person applying will bring it to the interview and both people will be entered into a raffle.
- Applications for Facility Attendants and Lifeguards are active, and interviews will continue.
- Staff are creating a Facility Attendant training manual.

BAY BEACH AMUSEMENT PARK

- Concessions and Shelters
 - Orders have been placed, and delivery of the new product has started for the souvenir shop.
 - Working with vendors to get new products.
- Rides
 - Nebulaz: Staff are working with the manufacturer, Zamperla, to address the current gear box issues.
 - Sea Dragon: Staff are working with Hydraulic Solutions on valve replacement.
 - West Train: Plans have been approved by the state. Refurbishment of the engine has been completed.
- Inclusive Playground
 - Working on donation "plaque". Waiting for business to get back to us. Finalizing should happen this week.
- Events/Projects
 - Getting started on staffing for the NFL Draft.
- Staffing
 - Activated accounts: 144 (waiting for 13 more).
 - No paperwork started: 13
 - Started paperwork: 10
 - 100% completed: 121
 - Working with a summer intern to create special events.
 - Interviews:
 - Concessions (need to hire 44 employees)
 - 144 Total applicants
 - 91 interviews scheduled
 - Ride Operator (need to hire 42 employees)
 - 44 Total applicants
 - 21 interviews scheduled

Metro Boat Launch

- The docks will be installed in early April.

Triangle Sports Area

- The facility is closed due to the recent snow melt. If we get more snow, we will consider opening again. The park will close to winter activities officially on March 16. The Parks Department needs time to switch the building over, so it is ready for rentals starting April 1st.

WILDLIFE SANCTUARY

- Planning is underway for Earth Day Celebration for Sunday, April 27th after the Draft. Planning also underway for the Otttoberfest event to be held on 10/18/2025. More details to come.
- 2025-2026 OAK 4K enrollment is underway with numbers very close to capacity (80), and several tours scheduled with prospective families.
- Upgrades started on the Woodland Building Kitchen and restroom as well as Observation Building kitchen.
- WLS staff completed the city's application for "Bird City" Status that it has had for decades.
- The Wildlife Sanctuary hosted the state Wildlife Rehabilitation conference. Nearly 150 fellow wildlife rehabilitators from around the state and beyond were in attendance.

ADMINISTRATION

- Reservations for shelter rentals are open for 2025 and we are getting a great response.
- Staff are continuing to support special event requests, with an emphasis on the NFL Draft.
- The 2025 hiring season has begun. We have rehired and offered positions to our returning staff, and many have already accepted and done their paperwork. All seasonal positions are now up and accepting 2025 applicants.
- Gift cards are available to purchase by phone, mailed, or in person in our office.
- Metal Detecting Permits are available for purchase online, or in person in our office.
- Pool passes are now available for purchase online, or in person in our office.
- Posted social media events, programs, and information.
- Annual Metro Boat passes are now available in the Parks and Recreation Admin Office for the 2025 season.
